

***SURFLAN:** For established BERMUDA

Rate: 2 quart/acre

Lawns: 1.5 oz per 2 gallons water will do 1,000 sq. ft

- Higher rate of 2-3 oz per 1000 sq. ft = longer control
- Will cause root pruning if used on Fescue
- Can be mixed w/ Glyphosate ... Acre = 2 qt....Lawn = 3 oz
- To be used on DORMANT BERMUDA

***PROWL H2O:** For all grasses

Rate: Same as SURFLAN (see above)

***PRINCEP:** For BERMUDA ONLY

Rate: Same as SURFLAN (see above)

***MSMA:** For BERMUDA & established FESCUE

Rate: 1 quart/acre

Lawns: 1.5 oz per gallon of water

- To be used when temperatures are above 80°—does not work in cool temperatures
- Can be tank mixed w/ TRIMEC. Mix in after water is in tank so as not to gel.
